Quick-connect system

More flexibility in floor cleaning

Extended application options for Hako Sweepmaster and Scrubmaster ride-on vacuum sweepers and scrubber-driers

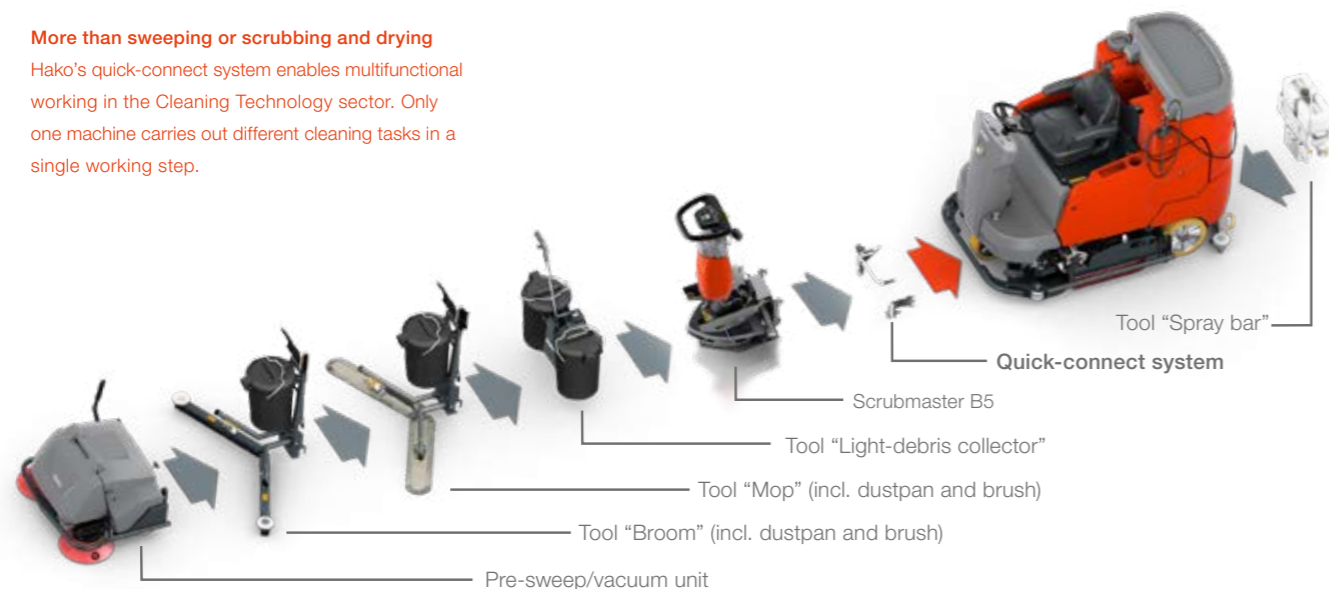

System solutions for even more application options!

Areas littered with light debris often require additional cleaning time and effort. Hako ride-on sweepers and scrubber-driers can be equipped with pre-cleaning tools or tools for special applications to ensure more efficient and cost-effective working. This is made possible by Hako's quick-connect system, which allows uncomplicated installation of additional tools for multifunctional applications. For even better cleaning results in even less time!

More than sweeping or scrubbing and drying

Hako's quick-connect system enables multifunctional working in the Cleaning Technology sector. Only one machine carries out different cleaning tasks in a single working step.

Sweeping while collecting light debris by hand

To make work easier for the operator, Hako's ride-on vacuum sweeper models Sweepmaster 900 R and 980 R/RH can be upgraded with a "Light-debris collector" tool via the quick-connect system. Coarse dirt can be picked up with the gripper and collected in the litter bin.

The "Light-debris collector" tool allows the operator to pick up coarse dirt with the gripper and collect it in the litter bin.

All tools at a glance:

This table shows which machine can be equipped with which tools via the Quick-connect system.

	Scrubmaster					Sweepmaster	
	B75 R	B120 R	B175 R	B260 R	B400 R	900 R	980 R/RH

Form, colour and design are subject to change without notice in favour of further technical development. Pictures may show optional equipment.

Double cleaning power: With a special holder, the Scrubmaster B5 can be easily taken to the next job site.

Perfect combination

Optionally available for the models Scrubmaster B175 R and B260 R: The pre-sweep/vacuum unit collects loose dirt prior to wet-cleaning the floor in order to save laborious pre-cleaning – also available with Dust Stop for low-dust sweeping and reduced fine particulate development.

Cleaning Technology becomes multifunctional

Hako's innovative quick-connect system allows fast and easy upgrading of selected Sweepmaster vacuum sweepers and Scrubmaster scrubber-driers to extend the machines' application options.

Benefits provided by the quick-connect system:

- Saves time and costs through the multifunctional use of Hako ride-on vacuum sweepers and scrubber-driers
- Pre-cleaning tools and tools for special applications can be connected quickly and intuitively, no tools required
- Optimised cleaning results in less time

Pre-sweep/vacuum unit with Dust Stop – option for low-dust sweeping and reduced fine particulate development for Scrubmaster B175 R and B260 R

Scrubmaster B5 holder – option for Scrubmaster B175 R, B260 R and B400 R and Sweepmaster 980 R/RH

Pre-sweep tool "Broom" – option for Scrubmaster B175 R, B260 R and B400 R

Pre-sweep tool "Mop" – option for Scrubmaster B175 R, B260 R and B400 R

Tool "Light-debris collector" – option for Scrubmaster B175 R, B260 R and B400 R, and Sweepmaster 900 R and 980 R/RH
